- Parking Garages
- Residential Gated Driveway
- Gate Access

Dynamic Assets

- Cloud Weapons Express
- Real Time RFID Weapons Issue
- Manual RFID Weapons Issue
- RFID Asset Tracking
- Barcode Asset Tracking

Temperature Monitoring

- Cloud Chain

Cloud Weapons Express™

weapons tracking solution using RFID technology.

Track weapon issue activity by adopting RFID technology to determine whether a weapon is issued to personnel either by your armory personnel or automatically using Cloud Collected fixed antennas.

Are you looking to know 100% if your weapons are in storage or assigned out - to who and for how long? Cloud Collected plug-and-play RFID weapons tracking solutions will retro-fit with your current or new lockers, safes and racks.

Cloud Weapons Express

Cloud Weapons Express provides Dynamic Asset Management (DAM) for Weapons and other high value assets such as body armor, night vision optics, specialized communications equipment are used by many organizations including Military, Police, Private Forces, Gun Clubs, Manufacturers and other institutions needing enhanced security.

Cloud Collected RTLS weapons tracking solution harnesses RFID, Biometric, Wireless and Cloud technologies to ensure weapons are in their correct locations - armory management, individual lockers, safes, racks or other storage units. Weapons can be checked-in or checked-out using different select authentication technologies with all of the details pushed into the cloud for instant availability to others, with automated alert action or actions taken based on system configuration. View asset activity and chain of custody issue in real time or run reports and review asset usage at any time.

Visibility from Anywhere

Every asset status change is stored in the cloud, accessible by authorized users from anywhere with a web browser - mobile phone, tablet, or desktop computer. Cloud Collected weapons monitoring and tracking software is built as a web-application, providing access to tracking and status updates from the secured SSL website URL, rather than a desktop/mobile application specific to a single device.

Key Features

- **Web-based Application** Accessible from any web browser (mobile phone, tablet, desktop computer) via a secure website URL.
- **Built-in Automatic Alert System** Send automated alerts when a weapon is removed or missing for longer than a specified time frame.
- **HTTPS API** Allows for secure integration with third-party software and existing systems.

All-Inclusive Package

Cloud Weapons Express™ is a turnkey solution - everything needed to get up and running is provided ready to install. Cloud Collected solutions include:

- All RFID Hardware including RFID tags for your specific assets
- All Wireless and Wired Communications Equipment
- All Software
- Hardware Support Services for multiple year support
- Cloud Services (Monthly Subscription or Local Appliance)

RFID-Enabled Weapon Tracking Products

Depending on your organization, you may choose different approaches for weapon issue.

If you need to manually scan weapons, either for weapon issue from an armory or inventory purposes, you will need a portable reader.

If you would like to have automated weapon issue where weapons are read by fixed readers on portals, inside safes, lockers or cabinets, then you may choose to use the RTLS system option.

Note, these solutions can be used together if you need both options.

**MANUAL RFID
WEAPONS TRACKING**

**AUTOMATED RTLS
RFID WEAPONS TRACKING**
