

CLOUD COLLECTED®

RFID Portable Traffic Monitor

Product Overview

What is Cloud Collected?

Cloud Collected turnkey solutions harness Wireless, RFID, Sensor, Biometric and other technologies to provide Dynamic Asset Management (DAM) Real Time monitoring, tracking, and managing for single or multiple sites and locations.

Our Turnkey Solutions as a Service (TSaaS) are fitted to your needs, easy to implement, and capable of expansion at any time.

Our Products

Tracking

- RFID Vehicle Monitoring
- Dealership Vehicle Availability
- Delivery Truck Availability
- Mobile Asset Management
- EMC/EMT Vehicle Assets and Personnel
- Fire Apparatus Assets and Personnel
- Police Vehicle Assets and Personnel
- Utility Assets and Personnel
- Other First Responders
- Other Mobile Assets
- Personnel Management
- Tour Guide Monitoring
- School Bus Monitoring
- Office and Warehouse Personnel Tracking
- Animal Tracking
- Remote Site Asset Management
- Tag Readers and Testers

Access Control

- RFID Vehicle Access
- Gated Communities
- High Security Facilities
- Parking Garages
- Residential Gated Driveway
- Gate Access

Dynamic Assets

- Cloud Weapons Express
- Real Time RFID Weapons Issue
- Manual RFID Weapons Issue
- RFID Asset Tracking
- Barcode Asset Tracking

Temperature Monitoring

- Cloud Chain

Portable Traffic Monitor

Our Total Solutions as a Service (TSaaS) Portable Traffic Monitor solution utilizes tamper-proof/destructible RFID tags to determine a vehicle's real-time location using strategically placed portable readers. With this secure RFID solution, you can monitor traffic flow for tagged vehicles in various locations of your choosing.

Portable Traffic Monitor

All-In-One Solution

Are you looking to monitor tagged vehicles through a route using strategically placed readers? Our RFID Portable Traffic Monitor solution uses individual RFID tags on a vehicle to observe its location in relationship to portable readers placed along your route.

With our total solution, you can be up and running with minimal effort. First, we determine your needs:

- Do you want your tags to attach to the vehicle windshield or hang on the rearview mirror?
Choose our tamper-proof/destructible RFID tags for added security.
- How many monitoring locations do you want to set up?
- How many lanes and direction for each location?

We will then configure and ship you the required hardware. You follow our directions to deploy the system at your location(s) as needed.

Next configure the system and then provide your vehicle assets with a secure and registered RFID tag. When the vehicle asset passes through a monitored location, the event is logged and sent back to the cloud to create a traffic flow pattern for you to review. Administrators use our cloud software to review logged data via a dashboard, detailed reports, or even set up specific alerts,

This RFID traffic monitor solution is a great fit for:

- Specific Events
- Bus or Taxi Traffic Monitoring
- Temporary use in Parks, Airports, Resorts

Easy Setup & Installation

1

We Customize Your Solution

Once we determine your requirements, we configure a package to fit into your location.

2

You Receive the Package

The package will include everything you need to get up and running - from the RFID hardware and RFID tags to gate hardware and software needed.

3

Connect Components

Components will be installation ready - all you will need to do is attach them to your desired location.

4

Customize Settings

Using our web based cloud software, you manage authorized tags and customize any settings to fit your location(s).

5

Place RFID Tag on Vehicle

Depending on the tag-type, either hang the tag on the vehicle's rearview mirror or attach it on the inside of the vehicle's windshield.

Complete Package

Our real-time Portable Traffic Monitor solution is a turnkey solution - we provide everything needed to get up and running. Our solution can be configured to include:

- **RFID Hardware** including vehicle RFID tags, antennas and readers
- **Portable Hardware** cases, poles, and other components for your specific needs (*optional*)
- **All Software**
 - Local Access Controller Software (Collection Agents)
 - Remote Cloud Software Service
- **Hardware Support** Services for multiple year support (*optional*)

Vehicle RFID Tag Options

Standard Windshield RFID Tag

These tags can be produced with your own logo, with or without a bar code and your choice of up to 4 colors or spot color and four color process.

- Standard colors include black, red, yellow, green and blue. Due to contrast needed for the bar code scanner all bar codes are black.
- Digital printing for detailed logos or special designs.
- All printing is subsurface which provides excellent resistance to solvents, caustics, acids and moderate.
- Standard Size: 10 cm x 2.5 cm (4 in x 1 in).
- Standard ID card footprint for attaching photo identification cards, Dynamic Tag Tracking

Destructible Windshield RFID Tag

When you want a tag that looks exactly like our high quality Standard Windshield Tag, but you do not want the tag ever used for another vehicle, then our Destructible Windshield Tag is what you need. This tag is produced identically to our standard tag except that it has special slits in the inlay so that when someone tries to remove the tag it self destructs and can never be used again on another vehicle.

- These tags are produced with your own logo, with or without a bar code and your choice of up to 4 colors or spot color and four color process.
- Standard colors include black, red, yellow, green and blue. Due to contrast needed for the bar code scanner all bar codes are black.
- Digital printing for detailed logos or special designs.
- All printing is subsurface which provides excellent resistance to solvents, caustics, acids and moderate.
- Standard Size: 10 cm x 2.5 cm (4 in x 1 in).

Rear View Mirror RFID Hang Tags

Rearview mirror hang tags that you can use for allowing temporary or even permanent access. These hang tags can be printed with your logos and even advertising for a memorable parking experience.

- **Small** 88.9 mm x 88.9 mm x 0.7 mm (3.5" x 3.5" x 0.027")
- **Large** 88.9 mm x 165.1 mm x 0.7 mm (3.5" x 6.5" x 0.027")

Features and Components

Hardware	
RFID Hardware	
RFID Tags	Choice of: <ul style="list-style-type: none"> - Standard Windshield RFID Tag - Destructable Windshield RFID Tag - Rearview mirror hang RFID Tag
RFID Reader	UHF Gen 2 Supports 32 Antennas each <i>Multiple readers per location allowed</i>
RFID Antennas	Choice of over 50 antenna types depending on your installation needs. <i>Note: Additional mounting hardware may be required depending on your setup.</i>

Software	
Local Collection Agents	
Mini-PC	A Mini-PC will be installed at each location to control all hardware components (RFID Readers/Antennas and Gate Interfaces). Network connectivity must be provided. The Mini-PC communicates with the cloud to determine which tags are authorized and log activity.
Cloud Synchronization	Local agents are kept up to date by the cloud. Each location will always have the latest authorized tag information. If there is a network outage at the location, the software will continue to run in a cached offline mode so that your operations will continue normally.
Cloud Software	
User Access	<ul style="list-style-type: none"> - Grant your office staff access either by each location or across the entire organization. - View logs of user activity.
Manage Tags	<ul style="list-style-type: none"> - Upload your authorized tags via a spreadsheet and/or manage tags individually. - Grant or revoke access to the location or an individual gate on a per-tag level. - Add additional data to each tag such as vehicle type and owner.
Locations	View the status of your gate locations in real time.
Reports	View reports showing vehicle in and out activity by gate. Export reports to Excel or print them for further review.
Alerts	Setup SMS or Email alerts from your system for: <ul style="list-style-type: none"> - Location outages such as network or power failures. - Specific vehicle activity; receive an alert when a specified vehicle enters or exits the location.
API	Looking to synchronize your current vehicle database system with ours? We offer a full RESTful API that allows you to get your data in real time. <ul style="list-style-type: none"> - Asset Synchronization - Asset Activity Data Pulls
